Radical Statistics Group

Radical Statistics was formed in 1975 by researchers and statisticians with a common concern about the political implications of their work and an awareness of the actual and potential misuse of statistics. Radstats is independent of any other organisation. Members are 'Radical' in being committed to helping build a more free, democratic and egalitarian society. Our particular concerns are:

- The mystifying use of technical language to disguise social problems as technical ones
- The lack of control by the community over the aims of statistical investigations, the way these are conducted and the use of the information produced
- The power structures within which statistical and research workers are employed and which control the work and how it is used
- The fragmentation of social problems into specialist fields, obscuring connectedness

Contributions to *Radical Statistics*

Suggestions and contributions are welcome. Articles or comments can be topical or cite the earlier work of RadStats, which has been active since 1975. Book reviews and short comment or news pieces are particularly welcome. We also welcome articles that adopt an international perspective on Radical Statistics.

Articles on whatever topic can be submitted to editors@radstats.org.uk.

If you have an interest in a specific topic area and would like to get involved in editing a special issue please get in touch and we can put out a call for papers on the subject to the RadStats list to get you started.

The format for submissions may be found at www.radstats.org.uk/editors.htm.

Note that articles accepted for publication may be subject to agreed editorial changes and will usually appear in the next issue. If you have any queries, please contact the editors.

Refereed articles

If you wish to have your article refereed before publication, please state this clearly and send it via e-mail attachment if possible (as a rich text format file). Your article will be read for clarity and relevance to the concerns of Radical Statistics; amendments to improve the article may be required by the editors before publication as a refereed article.

Disclaimer

The views expressed are those of individual authors and are not necessarily shared by the Radical Statistics Group or its editors. Copyright remains with the authors, and requests to reproduce extensive material should be addressed to them. The Group and its editors cannot be held responsible for errors or any consequences arising.

Schedule for future publications

The next issue will feature reviews and articles on a range of topical subjects as well as discussion and articles arising from the 2016 Radical Statistics conference, *Statistics of Crisis in UK and EU*.
